

Vancouver Coastal Health Childhood Diabetes Workshop

January 29, 2010

*Morris J Wosk Centre for Dialogue
Simon Fraser University
Vancouver Room #420
580 West Hastings Street, Vancouver, BC

*Accommodation: Delta Vancouver Suites Hotel
550 West Hastings Street, Vancouver, BC*

PROGRAM

Paediatric /Child and Youth Council
Vancouver Coastal Health
in partnership with:
Child Health BC

Introduction

Workshop Summary

Child Health BC, in partnership with the Paediatric/Child and Youth Health Council, Vancouver Coastal Health, is hosting a knowledge transfer workshop on Diabetes. This regional workshop will provide an opportunity to discuss contemporary standards of care, and, with the participant clinical leaders and experts, develop a plan to address childhood diabetes. The participants will have opportunities to exchange ideas in both structured and informal settings.

Workshop Goal

To identify regional recommendations to address childhood diabetes across the continuum of care throughout VCH; standardizing care and management of Type 1 Diabetes and determining opportunities to prevent Type 2 Diabetes.

Workshop Objectives

- ◇ To optimize access to high quality health care and community services for children with Type 1 diabetes and their families in their communities
- ◇ To identify how to utilize existing community-based services to support prevention and management of diabetes in children living in Vancouver Coastal Health Authority geographic region.
- ◇ To identify opportunities and partnerships that will enhance the community's capacity to prevent Type 2 diabetes in children, specifically in at-risk children.

Agenda

Friday, January 29, 2010

8.00 am - 8.30 am	Breakfast and Registration
8.30 am - 8.45 am	Introductions and Overview The Health System and Constructing a “vision” for childhood diabetes care and prevention in VCH

4.00 pm - 4.30 pm	Wrap up – Next Steps and review of action items

VCH
**Paediatric/Child and
Youth Council**

Vancouver Coastal Health (VCH) is a regional health authority of BC. Historically, the needs of children and youth have been addressed through the facilities, health centers and partner agencies as well as provincial bodies such as Child Health BC and the Provincial Health Services Authority. In addition, the services provided for children and youth were further compartmentalized in to “silos” of acute care, primary care, public health and population health.

The Paediatric / Child and Youth Council was established to integrate this segregated approach into a coordinated single entity.

The Council members worked together to develop a common vision statement, establish values and determine the functions for the Council. It is through these lenses that the Council will develop, recommend and evaluate strategies for population health, acute care, public health and primary care. The agreed vision is:

“Children and youth will have equitable access to quality health resources they need to flourish and achieve their best health”.

CHILD HEALTH BC

**Building Capacity for
Infant, Child and Youth
Health Services**

Child Health BC, an initiative of the BC Children’s Hospital, is a network of health authorities and health care providers dedicated to excellence in the care of infants, children and youth in British Columbia. BC Children’s Hospital is an agency of the Provincial Health Services Authority.

Our mandate is to bring together partners from the Health Authorities, the Ministry of Health Services, the Ministry of Children and Family Development, the Ministry of Education the Ministry of Healthy Living and Sport and other provincial agencies and services to optimize the health of children and youth and to improve access to high quality clinical health services.

Child Health BC is working to ensure children receive the right service at the right time, in the right place, by the right provider.

Through many cooperative partnerships; regional subspecialty programs; education and dissemination; research; monitoring quality and performance; and developing standards, protocols and guidelines, Child Health BC is creating an integrated, standardized and accessible system of care available to all children in British Columbia.

Workshop Details

FRIDAY, JANUARY 29, 2010

Registration will begin at 8.00 am outside of the workshop room in the Morris J Wosk Centre for Dialogue, Simon Fraser University at 580 West Hastings Street. A continental breakfast with coffee and tea will be available.
