

Program Objective: To ensure that children at risk for hip displacement receive appropriate screening and are referred to a paediatric orthopaedic surgeon at the appropriate time to minimize or prevent complications associated with hip dislocations.

Milestones since June 29, 2018:

Clinical Milestones

- Continued provincial recruitment with total of 774 children enrolled (35% of expected children with cerebral palsy born 2000-2016).

Knowledge Translation & Communication

- Finalized program You-tube video (<https://youtu.be/Jizgox9JQzM>)
- Updating e-learning module and translated parent booklets (Simplified and Traditional Chinese, Punjabi, Korean, and Arabic) to reflect 2018 guidelines
- Identified groups to contact re: hip surveillance program recruitment: Nursing support services, Doctors of BC, Infant Development Program, Aboriginal Infant Development Program, BC Pediatric Society, First Nations Health Authority

Data Management System & Evaluation

- Completed 75% of data entry into the Hip Surveillance Program Filemaker Pro database
- Developing guidelines for auditing and monitoring user access as per requirement of Privacy Impact Assessment
- Developed contract to ensure database sustainment

Province-wide Collaboration & Leadership

- Continue to work with colleagues in Edmonton to develop a strategy to enroll and follow children receiving orthopaedic care at Glenrose Rehabilitation Hospital.
- Completed development of a survey for parents/caregivers to learn about their experience in receiving a diagnosis of CP or other life changing diagnosis together with colleagues from neurology.

Next Steps & Target Dates:

- Complete update of e-learning module and translate booklets to reflect updated 2018 guidelines – November 30, 2018.
- Distribute parent survey – December 1, 2018
- Recruit community pediatrician to Advisory Committee – November 1, 2018
